## 01 – Algemeen (General Settings)

### Activeren retina afbeeldingen (Activate retina images)

In case you would like to use retina images you will need to activate this option.

When you activate this option you will need to upload the retina variant of each image. This image will need to be exactly twice the size of the regular original image. The size of the retina images can be found in this manual for each image.

### Logo

You can upload the logo here. This logo will be shown on top of the page.

*Size original image: 260 x 100 pixels*

*Size retina image: 520 x 200 pixels*

### Logo sidebar

You can upload the logo for the sidebar (left navigation) here. This logo might differ from the standard logo on top of the page, considering the fact that the background of the sidebar is different from the general background colour.

*Size original image: 135 x 50 pixels*

*Size retina image: 270 x 60 pixels*

### Favicon

This gives you the possibility to upload a favicon (the image shown in front of your page title in the browser tabs). The favicon is usually a smaller version of your logo.  
het logo, welke getoond zal worden naast de titel in de titelbalk van uw browser.

*Size: 16 x 16 pixels*

### Lettertype (font)

You can choose from different Google Fonts. This setting will change the regular tekst in your webshop.

### Lettertype titel (title font)

You have the option to choose a different Google Font for the titles. By using different fonts for titles and tekst you can make titles stand out more.

### Lettertype grootte (font size)

Simply change your font size.

**Achtergrondkleur (background color)**

Set the background colour for your shop.

**Tekstkleur (text color)**

Set the colour for text on your webshop.

**Accentkleur (color accent)**

You can set a second colour to support the total colour palet of your shop. This colour will be used to highlight some smaller aspects on the shop.

**Linkkleur (color of links)**

This colour will be used when a text has a link.

**Prijskleur (price color)**

Set the colour for the prices on your shop here.

**Kleur winkelwagen buttons (color shopping cart button)**

You can set the colour for your shopping cart buttons here. Considering you'd want the best conversion rate possible we suggest you use a contrasting colour that stands out, such as orange, green or blue. Of course you have to make sure that the colour goes with the other colours on your shop.

**Kleur winkelwagen info (color information button)**

Set the colour for the 'More information' buttons.

**Zichtbaarheid nieuwsbrief (activate newsletter sign up)**

Choose to show the newsletter sign up box or to hide it.

**Achtergrondkleur label nieuwsbrief (background color newsletter label)**

You can set the background colour for the newsletter label here. When the newsletter sign up is activated a label will appear bottom right. Visitors will be able to click on it and they can easily sign up for the newsletter. By giving this label a colour that stands out you will be able to attracts the visitors' attention.

**Aanbieding nieuwsbrief popup (newsletter call to action pop-up)**

To trigger your visitor to sign up for your newsletter you have the possibility to place a call to action text in the pop-up, such as 'Sign up an receive a 10% discount!'.

## 02 – Navigatie (Navigation)

**Achtergrondkleur navigatie (background color navigation)**

Set the background colour for the left navigation (sidebar).

**Tekstkleur navigatie (text color navigation)**

Set a colour for the text in your navigation. Make sure you use a colour that stands out form the selected background colour for your navigation.

**Navigatie highlight kleur (navigation highlight color)**

This colour will be used for active categories and when a visitor places the cursor on a category. This will show visitors which category has been selected.

**Navigatie icons (navigation icons)**

Activate this option if you would like to place icons in front of the categories in the side navigation.

**Step 1:** Go to Tools > Files and click the  to add files. After uploading click on  and copy the URL you see. You will need this URL later.

**Step 2:** To match the icons with the right category go to Design > Custom Translations and add a new translation for every category. As key for every translation fill in 'icon' with a number corresponding with the category order. So icon1 for the first category, icon2 for the second category and so on.

**Important:** the order of the categories is also the order of the icons. Remember this when you change the order of your categories. If your first category becomes your seconde category it will match with the second icon 'icon2' and the second category will now match 'icon1'.

**Step 3:** Fill in the URL you copied in step 1 as a translation.

For the best result we advise you to use a .png image with a transparant background.

You can download free icons on the following websites:

<https://thenounproject.com/>

<http://www.flaticon.com/packs/>

## 03 – USP's

**Achtergrondkleur USP balk (background color USP bar)**

Set a colour for the USP bar.

**Kleur USP icon (colour USP icon)**

You can set a colour for the USP icons. Give your icons a contrasting colour and your USP's will definitely pop out.

**Kleur USP tekst (colour USP text)**

You can set the colour of your USP text here.

**USP 1, 2, 3**

Enter the text for your USPs here.

### **USP link 1, 2, 3**

Add a specific URL to the different USPs.

### **USP icon 1, 2, 3**

You can choose from a couple of icons we have selected for you. On [this](#) page you can find an overview of all available icons. Note that not every icon you find here is to be found in the theme setting. We have selected the most common icons for you and these can be found under the same name as named in the settings. If you need an icon that is in the overview but not in the theme, just let us know and we will be able to add it to the settings.

## **04 – Home pagina (homepage)**

### **Zichtbaarheid – Aanbevelen (visibility recommended products)**

Either show or hide the recommended products on your homepage. When you choose to show the recommended products you can select the products you would like to show at Design > Products homepage.

### **Zichtbaarheid – Nieuwste producten (visibility new products)**

Choose to show or hide the latest products on your homepage.

### **Zichtbaarheid – Aanbiedingen (visibility sale items)**

Do you want to show or hide the sale items on your homepage? Set your preference here. The sale items that are shown are products that have been selected at Design > Products homepage AND have a sale price (old and new price). If a product does not have a sale price and/or hasn't been selected under Design > Products homepage it will not appear as a sale item on the homepage of your shop.

### **Zichtbaarheid – Tags (visibility tags)**

You can either show or hide tags. For SEO reasons we advise to hide the tags on homepage and category pages. Do you want to know why? Read the following:

Incorrect use of tags can have a severe negative impact on your organic rankings in the Google Search Results. When you use very generic keywords for your tags or when you use keywords for your tags that are already part of your menu items (navigation) it will be problematic for SEO. We also advise to choose tags wisely and to not use too many tags.

When you hide tags on the homepage and category pages your tags are not completely gone. You will still be able to add tags in the backend of your shop and the tags will still show up on product pages. The tag pages can also still be indexed by Google and show up in the search results.

### **Featured Product Slider**

With this option you can choose how you want to display your products on the homepage. Instead of showing them in rows you can show them more compact in a slider.

## KiYoh widget

Enter the URL of your KiYoh widget here. These are the instructions:

Log into your KiYoh account and go to 'Publish'. Choose the middle-sized widget. Copy the code.

*Important: For the best result you will need to remove the iFrame.*

This is the standard URL:

```
<iframe scrolling="no"  
src="https://www.kiyoh.nl/widget.php?company=6833&size=180x117"  
width="180" height="117" border="0" frameborder="0"></iframe>
```

Change it to:

<https://www.kiyoh.nl/widget.php?company=6833>

## Feedback company widget

Go in the back office of The Feedback Company to the cup Widgets. Here you can choose between different widgets. For the best result choose the widget below:

Select this widget and adjust it to your liking.

Then click Voltooien. In the next screen you will find the code that is related to your widget.

You only need a part of this code, the part between src="", so for example:

<https://beoordelingen.feedbackcompany.nl/widget/30064.js>

Paste this code in the appropriate field under Design> Settings.

## WebwinkelKeur widget:

You will only need to enter you client ID.

*Important: For the moment it is not possible to show two widgets at the same time.*

With this theme you can choose to show the widget on the homepage next to the slider images or in the footer. These options can't be used both at the same time so we recommend choosing either option 1 or option 2. WebwinkelKeur is currently working on a solution.

### Weergave banners (banner lay-out)

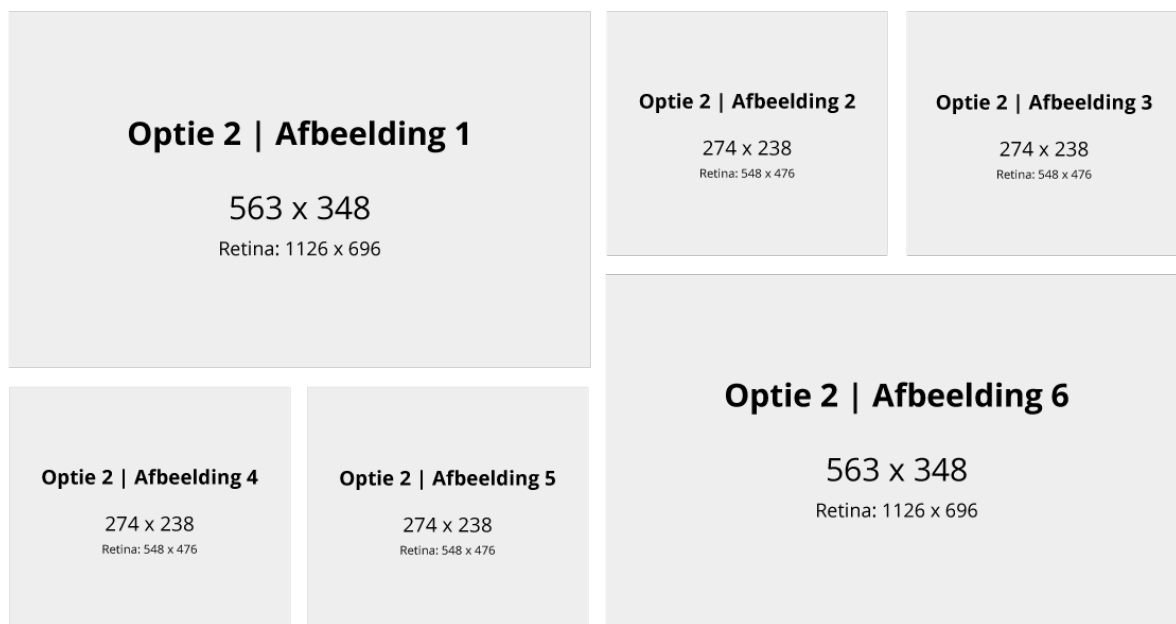

Within this theme you can choose between 3 different banner lay-outs. Continue reading for more information on the differences, sizes and important information.

#### Option 1

This option features static images. The images can be uploaded at 04 Homepage | Optie 1. See the screenshot below for recommended sizes and reference numbers.

## Option 2

This option features static images. The images can be uploaded at 04 Homepage | Optie 2. See the screenshot below for recommended sizes and reference numbers.

## Option 3

This option features a slider with rotating images. The images can be uploaded at Design > Headlines.

See the screenshot below for recommended sizes and reference numbers.

#### Alt-tags

You can enter a unique alt tag for every image on the homepage. This is important because now you can use SEO-friendly alt-tags.

## 05 – Categorie pagina (category page)

### **Weergave producten (productpage view)**

Choose how many products you want to show on one line on a category page. You can choose to show 3, 4 or 5 products shown next to each other.

Do you have a select number of items? Choose to show 3 products to give the page more body. If you have a lot of products you can choose 4 or 5 products to keep things clean and neat.

### **Weergave categorie tekst (placing category text)**

You can choose to show the category text on top of the page or at the bottom.

### **Weergave categorieën (category page view)**

Select how many categories you want to show on one line on category overview pages. You can choose to show either 4, 5 or 6 categories next to each other.

Do you have a select number of categories? Choose to show 4 categories to give the page more body. If you have a lot of categories you can choose 5 or 6 categories to keep things clean and neat.

### **Categorie banner (category banner)**

Upload a category banner here. This banner will be shown at the top of the category page. Use it to let your customer know about your USP's or special offers for example. Be aware of the fact that the uploaded image will appear on every category page.

*Size: 1110 x 195 pixels*

*Size retina: 2220 x 390 pixels*

### **Categorie banner link (category banner URL)**

Add a URL to your category banner to redirect customers to a specific page on your webshop.

### **Categorie banner alt-tag (category banner alt-tag)**

Add a unique alt-tag to your category banner.

## Winkelwagen button (shopping cart button)

### Shop now

When you choose this option your visitors will be able to easily order a product. When a visitor clicks on the Shop Now button a pop-up of your product page will appear. Your visitor can directly select the right product options (when available), custom fields and a quantity. This will speed up the order process and this can definitely boost your conversion rate! The Shop Now feature is a very nice feature when you use custom fields.

### Pop-up

When choosing this option the selected product will directly be added to the shopping cart. To make this clear to the visitor a pop-up will appear and within this pop-up the visitor will be able to either choose to continue shopping or to proceed to checkout. If the visitor chooses to continue shopping the pop-up will close and the visitor will still be on the product page. Otherwise the visitor will be directed to the cart.

Note that if a product has custom fields the pop-up feature will be replaced by a 'more information' button.

## Weergave kleur filter (design of colour filter)

### Visueel gekleurde blokjes (coloured boxes)

If you are using a filter on colour you have the possibility to show the colours within this filter as coloured boxes instead of plain tekst. This way the filters are more visually attractive and clearer.

*Important: this feature will only work if you have a filter with either of the following names: Kleur, kleur, Kleuren, kleuren, Color, color, Colors, colors, Colours or colours. If you filter name differs from the names mentioned here the colour filter design will not work.*

### Tekst (text)

When you do not wish to make use of the coloured boxes you can choose for the text option. The filters will now be shown as plain text.

## Zichtbaarheid – Vergelijken (visibility compare feature)

Either show or hide the option to compare products.

## Zichtbaarheid – Verlanglijst (visibility wish list feature)

Show or hide the wish list feature for your products.

Our SEO experts advise you to hide the compare and wish list feature for the following reason:

When you would use a tool to check your category pages and you have activated one or two of the features mentioned, the tool will probably let you know it thinks your page is about either a wish list or a comparison. These keywords show up most often on this page.

Also it has become clear that these options are rarely being used.

### **Zichtbaarheid – Merk voor producttitel (visibility brand name in product title)**

If you have entered brands in the backend of your shop and when you have connected them to the products you may or may not want to include the brand name in the product title.

In some case adding the brand to your URL results into URLs that are simply too long. They will be 'cut off'. In other cases brands don't add any value to your SEO. In both cases you could opt to not include the brand name in the product titles.

### **Zichtbaarheid – Review sterren (visibility review stars)**

Do you want to show or hide the review stars beneath the products on category pages? Select your preference here.

### **Zichtbaarheid – Prijs slider (visibility price slider)**

A price slider will automatically be included on category pages. If you do not wish to show this slider you can set this here.

### **Zichtbaarheid – Sale label (visibility sale label)**

If you have items on sale a sale label will automatically appear. You can choose to show or hide this label.

### **Kleur sale label (sale label colour)**

If you have chosen to use the sale label in the previous setting you can set a colour for this label here.

### **Tekst sale label (sale label text)**

Enter the text you would like to include in your sale label.

## **05 - Product pagina**

### **Weergave productopties (product options design)**

#### Dropdown lijst (drop-down list)

With this option the standard drop-down with product options will be shown.

#### Individuele weergave (individual boxes per option)

With this option the product options will be shown as separate boxes. This way the visitor will have a direct overview of all possible product options and which options are currently not available.

See the following screenshot as an example:

€69,95 **€49,95**  
Incl. BTW

Bestel 2 stuks voor €42,46 per stuk en bespaar 15%

1

In winkelwagen

## Product winkelwagen button (product shopping cart button)

### Popup

When choosing this option the selected product will directly be added to the shopping cart. To make this clear to the visitor a pop-up will appear and within this

pop-up the visitor will be able to either choose to continue shopping or to proceed to checkout. If the visitor chooses to continue shopping the pop-up will close and the visitor will still be on the product page. Otherwise the visitor will be directed to the cart.

Note that if a product has custom fields the pop-up feature will be replaced by a 'more information' button.

### Standaard (Standard option)

This option will direct visitors directly to the cart when adding a product to the shopping cart.

## Zichtbaarheid – Timer (Visibility timer)

Within this theme it is possible to show a timer on product pages. You can also hide this feature.

With a timer you can highlight a specific USP. For example: order within the hour and your order will be shipped today!

The timer will be an extra trigger for visitors to add a product to the cart.

### Eindtijd timer (timer ending)

You can set the time for the timer to end. For example: you offer next day delivery for orders placed before 16:00h.

In this case fill in 16:00. Use the format HH:MM (HOURS:MINUTES)

### Trigger timer

You can fill in the text you would like to show above the timer. For the example for the previous setting you could write something like 'and receive your order tomorrow!'

**Product banner**

If you would like to show a banner on your product pages you can upload an image here. The image will appear just above the shopping cart button. This product banner can be used to trigger visitors to add the product to the cart by showing your best USP. Or you might want to let visitors know that if they have any inquiries about your products or service they can contact you directly by e-mail, chat or telephone.

*Size: 253 x 75 pixels*

*Size retina: 506 x 150 pixels*

**Product banner link**

Here you can add a hyperlink to your product banner

**Product banner alt-tag**

Here you can add a unique alt tag to your product banner

## 07 – Footer

### **Achtergrondkleur footer (background colour footer)**

Set a background colour for the footer of your webshop.

### **Tekstkleur footer (colour of text in footer)**

Set a colour for the text in the footer. Make sure you use a colour that stands out from the background colour.

### **Zichtbaarheid – RSS feed (RSS feed)**

Choose to hide or show the RSS feed feature.

## 07 – Footer | Contact informatie (Contact information)

When you fill in any of the settings below they will appear in the footer of your webshop.

### **Over ons tekst (About us text)**

Here you can add a short description about your webshop/company. This description will be placed in the Footer at the bottom of the page.

### **Bedrijfsnaam (company name)**

Enter your company name.

### **Straatnaam + huisnummer (street and number)**

Fill in the street and number of your company's address here.

### **Postcode (zip code)**

Enter the zip code here.

### **Plaats (city)**

Let customers know where your company is located.

### **Telefoonnummer (telephone number)**

Fill in your phone number to give visitors the possibility to contact you by phone.

### **E-mailadres (e-mail address)**

Enter your e-mail address here.

### **Kvk nummer (Chamber of Commerce number)**

Fill in your Chamber of Commerce credentials here.

### **BTW nummer (tax number)**

Fill in your taks number here.

## **07 – Footer | Social media**

### **Social media bar**

Here you can enable or disable the social media bar above the footer.

### **Achtergrondkleur social balk (background colour social media bar)**

Set a background colour for your social media bar. Social media icons will show in this bar.

### **Tekstkleur social balk**

Choose a colour for text in your social media bar. Make sure you use a colour that stands out from the background colour.

### **Twitter**

Enter the URL to your Twitter account.

### **Facebook**

Enter the URL to your Facebook account.

### **Google+**

Enter the URL to your Google+ account.

### **Pinterest**

Enter the URL to your Pinterest account.

### **YouTube**

## Additional services - SEA

### AdWords management

With OOSEOO as your partner for online marketing you are guaranteed the best possible AdWords management according to the latest developments in SEA. This way you can make the most out of your AdWords budget.

When you let OOSEOO professionally manage your AdWords campaigns you can expect high quality management by a team of experts.

The OOSEOO service goes far beyond simply setting up and managing your account. Our AdWords specialists are ready to take your advertising campaigns to the next level.

Do you want to start advertising with AdWords? Contact our specialists today for more information!

**We've got a special offer for SEOshop merchants: AdWords Try Out: we manage your AdWords campaigns for two months.**

*OOSEOO AdWords Try Out: €599,00 excl VAT*

### Bing Ads

Start advertising with Bing today! The Bing search engine may not bring you the traffic Google brings you, but advertising with Bing Ads will also cost you just a fraction of the needed Google AdWords budget. We can easily set up your AdWords campaigns and bring them to the Bing Ads platform to give you the full SEA deal.

Contact us for more information on our combined AdWords and Bing offers.

## Google Shopping

When you use Google to find what you are looking for online you will probably have come across Google Shopping. Google Shopping consists of several product images including product prices and merchants shown in the Google search results.

Google Shopping is a very powerful way for merchants to advertise with Google AdWords. By directly showing users the product and corresponding price they can easily decide which product they like and where they can buy it.

To start advertising with Google Shopping you will need the product feed SEOshop has made available. You will find this feed at Settings > Google Products. However, just the feed alone won't make you visible in Google Shopping. To start advertising you will also need the following:

An active Google AdWords account

A Google Merchant Center with the right settings (Shipping and a claimed and verified URL)

A working product feed added to your Merchant Center

A connection between

A google Shopping

Please be aware that  
account is free, but  
amount per click.

**Do you want to start advertising with Google Shopping but could you use some help setting up the accounts and campaign? Leave it to us to do it for you!**

**For you as SEOshop merchant we can quickly set up a Google Shopping campaign. This way you won't have to worry about getting the settings right to start your campaigns. After letting OOSEOO set-up your accounts and campaign you can manage the campaign yourself.**

*One time Google Shopping set-up: €149,- excl VAT*

## Additional services – SEO

### Linkbuilding & Content Marketing

In order to be able to compete with your competitors in the organic search results you need to have good quality referrals to your website.

OOSEOO can help you improve your organic results by offering our Linkbuilding & Content Marketing services.

Are you interested in our Linkbuilding & Content Marketing services?  
You will find more information on [www.ooseoo.com/linkbuilding](http://www.ooseoo.com/linkbuilding).

### Keyword Research + Navigation structure

A keyword research is the foundation for good organic results. With a keyword research you will get insight in the search behaviour of users in Google. This will help you determine which keywords are interesting to use for the optimization of your webshop.

By letting OOSEOO conduct the keyword research you are sure that you will receive a report of any possible keyword that is good to use for optimizing (sub) category pages, product pages and tags.

After a Keyword Research it is wise to also let us set up a navigation structure advice for your webshop. This advice will be based on the results of the keyword research while also looking at SEO and usability.

Do you also want a good foundation for your SEO? Always start with a keyword research and the right navigation!

Contact OOSEOO for a detailed keyword report and a good navigation advice.

More information about our keyword research and navigation structure advice can be found at [www.ooseoo.com/zoekwoorden-onderzoek](http://www.ooseoo.com/zoekwoorden-onderzoek).

### SEO Copywriting

For good organic positions content is key. To optimize your shop you will need to create and add SEO friendly texts to homepage, category pages and product pages.

Do you want to make sure you have perfectly optimized texts that are still nice to read? Do you lack creativity or time to write your own texts? Contact OOSEOO!

More information: [www.ooseoo.com/seo-copywriting](http://www.ooseoo.com/seo-copywriting).

## Additional services – Design

OOSEOO is not only an expert when it comes to online marketing. Our employees are ready to face any design challenge you may have!

You can contact us for projects such as:

Changing your webshop to a new template;

Creating professional banner sets for your webshop;

Redesigning your webshop based on an existing template;

Custom designs for your webshop;

Logo design;

Newsletter templates;

Adjustments to your existing design;

Responsive design.

Our OOSEOO designer always work with eye on conversion. This means that we do not only deliver *nice* webshops, we also deliver webshop that are user-friendly and functional. By combining the creativity of our designers and the online marketing expertise of our marketers we always create the best result.

Are you curious to see what we can do in the field of web design? Please take a moment to look at our portfolio at [www.ooseoo.com/portfolio](http://www.ooseoo.com/portfolio) (in Dutch).

You can always contact us to see if we can help you out with your design. After going through your wishes and preferences we are able to send you an offer for our services.

### Special offers

For SEOshop customers using the OOSEOO SEOnista theme we have several offers lined up! These are tailor made to give your webshop the right look and feel when using the SEOnista template. Have a look at our special offers to see what we can do for you.

### Banner set SEOnista (per language)

OOSEOO creates a banner set according to your wishes. Using the right banners is extremely important. The important of using professional banners usually gets underrated, but the good banners create the image you want to show and this can distinguish you from your competitors. Banners that are blurry or that look amateurish can have a big negative impact on your webshop its conversion rate.

Are you having difficulties creating good banners? OOSEOO is here to help! When choosing OOSEOO to create your banner set you will receive the following banners and image to fill the SEOnista template:

USPs (with a maximum of 4)

Banners + headlines (with a maximum of 3) homepage  
(depending on chosen setting)

Favicon

Background image header

Banner above the footer

Category banner

Product page banner

Before we start working on your banners you have the possibility to let us know what you are looking for. We are very happy to receive your input so that we know which texts to use, such as offers and USPs.

Based on your input we will design your banners. You will then have the opportunity to give feedback on our designs. This is the so-called correction round. Think about changes in colour, texts, etc.

Your feedback will be used to make changes to the design and the final banner set will be sent to you in .JPG format. You are then able to upload these banners to your webshop.

*Banner set SEOnista: €499,00 excl. VAT*

Additional correction rounds can be bought at hourly rate.

## **Newsletter template (for MailChimp & MailCampaigns, other providers after consultation)**

Do you send newsletters to your subscribers? A message is better received when you communicate very clearly. That is why it might be wise to get the layout and look of your webshop in line with the design of your newsletter. This will also create a better feeling with your brand.

When you are using MailChimp or MailCampaigns to send your newsletters, OOSEOO can create a template that matches the look and feel of your webshop.

A template is a design which you can use for all your newsletters.

When you let OOSEOO design your newsletter template, the following process will apply:

We will discuss your preferences and wishes

According to your input and the current design of your shop we will design a newsletter template

You will receive the template design and you will have the opportunity to give feedback (correction round)

Based on your feedback changes will be made and the final template will be delivered to you

*Designing and creating newsletter template: €349,00 excl. VAT*

Additional banners and images for your newsletter our webshop can be bought at hourly rate.

Additional correction rounds can be bought at hourly rate.

## Logo design

A good logo is of great importance. The perfect combination of graphic elements with text creates the right image for your shop and a better feeling with your brand.

That's why you can never think too easy about a logo. Just like the saying 'A picture says more than a thousand words', this also goes for a logo.

Are you missing that extra touch of professionalism and branding? Is your current logo not really carry out the message you want? Contact OOSEOO!  
Our designer are very skilled in designing beautiful logos for a variety of industries.

When you let OOSEOO design your logo, the following process will apply:

We will discuss your wishes and look at examples and colour schemes to get an idea of your preferences

Based on your input we will design three different logos. These designs will differ from each other to offer you a choice

You can choose one logo and/or give feedback. This is a correction round.

Based on your feedback changes will be made and the final design will be delivered to you

The final design will be delivered to you in several formats. This gives you enough flexibility to make use of the logo in different ways. It makes the logo suitable for use both digital and on print.

*Logo design + correction round: €249,00 excl. VAT*

## **Additional correction rounds can be bought at hourly rate. General Terms & Conditions & Disclaimer**
